Christie’s East Hampton — Platform Council Brief

Date: April 6–7, 2026
Prepared by: Manny (Platform Architect)
For: Ed Bruehl · Full Council
Version: Sprint 15 Final · Checkpoint `c466c367`

Executive Summary

The Christie’s East Hampton Intelligence Platform is fully operational across all six tabs and the standalone Report page. All exports are functional. All 11 hamlet photos are live on CDN. The Ascension Arc is visually clean. The Market Report PDF now generates reliably in the browser without server dependency. The platform is ready to publish.

Platform Architecture

Front-End Stack

The client is built in **React 19 + TypeScript + Tailwind CSS 4**, deployed as a Vite single-page application. Navigation is a sticky top bar with seven destinations: HOME · MARKET · MAPS · PIPE · FUTURE · INTEL · REPORT. A live financial ticker runs below the nav bar, pulling S&P 500, Bitcoin, 30Y Fixed Mortgage, Gold, Silver, VIX, 30Y Treasury, and Hamptons Median from live data sources, refreshed every 30 minutes. Weather and date are shown in the far right of the ticker row.

Back-End Stack

The server runs **Express 4 + tRPC 11** on Node.js. All data procedures are typed end-to-end via tRPC — no REST routes, no Axios wrappers. Authentication is handled via Manus OAuth with JWT session cookies. The database is MySQL/TiDB via Drizzle ORM. Google

Sheets integration runs server-side via a service account, providing live data to the MARKET, PIPE, and INTEL tabs.

PDF Engine

All PDF exports use **jsPDF** (client-side, no server required). The Puppeteer server-side route has been deprecated for the Market Report and replaced with the same jsPDF engine used by all other exports. This eliminates the Chromium dependency that was causing production failures.

Storage

All static assets (hamlet photos, Ed headshot, logos, QR codes) are hosted on the Manus CDN via `manus-upload-file --webdev`. No images are stored in the project directory.

Tab-by-Tab Status

HOME Tab

The landing page opens with a full-bleed Christie's auction room hero, the Christie's International Real Estate Group logo, and the "Art. Beauty. Provenance. Since 1766." tagline. The live ticker is present. The Hamlet Matrix grid shows all 11 hamlets with CIS scores and median prices. The Christie's Auction Intelligence section shows upcoming auctions relevant to buyer conversations. The footer contains contact information, social links, and the WhatsApp briefing CTA. **Status: Clean.**

MARKET Tab

Eleven hamlet tiles render in a responsive grid. Each tile shows Ed's photography, the hamlet name, CIS score (navy badge with gold text), tier label (ULTRA-TROPHY / TROPHY / PREMIUM), median price, YoY change, and a DOWNLOAD PDF export button. Live data from the Google Sheets Market Matrix is merged with static hamlet data — CIS scores, medians, and YoY figures update when the sheet is refreshed. The EH Village CIS field mapping bug (showing 0.2 instead of 9.2) was fixed in Sprint 14. All 11 Ed photos are live on CDN. **Status: Clean.**

MAPS Tab

A full Google Maps integration shows the South Fork with hamlet boundary overlays. A sidebar grid of hamlet cards shows each hamlet's photo, CIS score overlay, and a three-button export row (Market Report PDF · Deal Brief PDF · ANEW Build Memo PDF). The CIS Calculator is accessible from this tab. **Status: Clean.**

PIPE Tab

The pipeline table pulls live from the Office Pipeline Google Sheet (ID: `1VPjIYPaHXoXQ3rvCn_Wx3nVAUWzM0hBuHhZV92mFz7M`). Deals are shown with address, hamlet, status, price, agent, and notes. Status changes made in the dashboard write back to the sheet in real time. **Status: Clean.**

FUTURE Tab

The Ascension Arc bar chart shows six bars (2025–2031) scaling against a $430M ceiling. The 2025" Bonita DeWolf pre-launch" sub-label has been removed—all bars now show year labels only, consistent and clean. The 300-Day Proof section shows three cards: First 100 Days (4.57M CLOSED), Second 100 Days (13.62M ACTIVE), Third 100 Days (55M PROJECTED). The agent volume table and GCI model are below. **Status: Clean.**

INTEL Tab

Five layers of institutional intelligence:

Layer	Title	Status
Layer 1	Institutional Mind Map	35 nodes, two parallel tracks, hover news panels (Perplexity 30-day, 5-min cache)
Layer 2	Master Calendar	Podcast calendar (52 episodes) + Event calendar (Headline + Private Collector Series)
Layer 3	Nine Sheets Matrix	All 9 Google Sheets listed with descriptions and OPEN SHEET buttons
Layer 4	Document Library	5 canonical documents with OPEN DOCUMENT / OPEN PDF buttons
Layer 5	Intelligence Web	41 entities, four tabs (All Entities · Jarvis Top Agents · Whale Intelligence · Auction Referrals), four filter controls

Mind Map spellings confirmed correct: **Bonnie Brennan** (line 85) · **Ilija Pavlovic** (with c). **Status: Clean.**

REPORT Page (`/report`)

The standalone Report page is the primary client-facing surface. It contains:

- Two download buttons: DOWNLOAD PDF (top-right) and DOWNLOAD MARKET REPORT (center) — both now use jsPDF, no server required
- Two audio buttons: LISTEN · FOUNDING LETTER and LISTEN · MARKET REPORT
- The full approved letter body copy (eight paragraphs, council-approved April 6, 2026)
- Section 3: Market Intelligence (Capital Flow Signal, rate environment, Hamptons Median)
- Section 4: Hamlet Atlas Matrix (all 11 hamlets with CIS scores)
- Section 5: IDEAS/CIS Intelligence (9 Daniels Hole Road model deal)
- Section 6: Christie's Auction Intelligence (4 upcoming auctions)
- Section 7: Resources & Authority (Christie's ecosystem links, contact, WhatsApp CTA)
- 9 YouTube video intelligence buttons
- Footer with full contact information

Status: Clean. Market Report PDF confirmed working on live site.

Export Inventory

Export	Location	Engine	Status
Market Report PDF (5-page)	Report page · MAPS tab hamlet cards	jsPDF (client-side)	Working
Christie's Letter PDF	MAPS tab hamlet cards	jsPDF (client-side)	Working
Deal Brief PDF	MAPS tab hamlet cards	jsPDF (client-side)	Working
ANEW Build Memo PDF	MAPS tab hamlet cards	jsPDF (client-side)	Working
CMA PDF	CIS Calculator	jsPDF (client-side)	Working
Investment Memo PDF	CIS Calculator	jsPDF (client-side)	Working
FUTURE Tab PDF Export	FUTURE tab	jsPDF (client-side)	Working
Founding Letter Audio	Report page	ElevenLabs TTS	Working

Hamlet Photo Registry

All 11 hamlet photos are Ed Bruehl's original photography, uploaded to Manus CDN.

Hamlet	Photo Description	CDN Status
Sagaponack	Wölffer Estate Vineyard	Live ✅
East Hampton Village	Main Beach boardwalk	Live ✅
Bridgehampton	Beach path + breaking surf	Live ✅
Southampton Village	Jobs Lane 1664 sign	Live ✅
Water Mill	Boardwalk over marsh	Live ✅
Sag Harbor	Windmill + harbor	Live ✅
Amagansett	Sunset beach + lifeguard stand	Live ✅
Wainscott	Dune path to ocean	Live ✅
East Hampton North	Wetland sunset house	Live ✅
Springs	Marsh dock + reeds	Live ✅
Montauk	Surfboards against dune fence	Live ✅

Hamlet Vibe Text Registry

All 11 hamlet vibeText fields updated April 6, 2026 with council-approved final copy.

Hamlet	Opening Line
Sagaponack	“Where the vineyard meets the Atlantic…”
East Hampton Village	“The center of gravity for the South Fork…”
Bridgehampton	“Where the farm stand sits a quarter mile from the breaking surf…”
Southampton Village	“Old money speaks quietly here…”
Water Mill	“A boardwalk across the marsh…”
Sag Harbor	“The windmill stands where Main Street meets the harbor…”
Amagansett	“Sunset over the lifeguard stand and nothing else for miles…”
East Hampton North	“Where wetland light meets open sky…”
Springs	“Jackson Pollock painted here because the light was honest…”
Wainscott	“A dune path to the ocean and nothing between you and the horizon…”
Montauk	“Where the road ends at the lighthouse and the Atlantic begins…”

Data Corrections Applied (Sprint 15)

Field	Was	Now	Source
EH Village CIS (MARKET tab)	0.2	9.2	Field mapping bug fixed (cisScore → cis)
EH Village YoY (PDF Report)	+8.2%	+9.2%	Council directive April 6
EH Village DOM (PDF Report)	112	61	Council directive April 6
EH Village $/sqft (PDF Report)	$1,420	$1,420 est.	“est.” label added pending primary source
EH North last sale	TBD · TBD	Hidden	No reference sale available
Wainscott last sale	—	115 Beach Lane · $59M · Mar 2026	Confirmed correct — “Succession” estate
Ascension Arc 2025 label	“Bonita DeWolf pre-launch”	Year label only	Council directive April 6

Open Items (Held Pending Delivery)

Item	Status	Waiting On
Restaurant data (11 hamlets, 3 tiers each)	HELD	Perplexity delivery
Compass Mind Map node	HELD	Perplexity brand attribution paste-ready block
EH North last sale	HELD	Reference sale from Ed
INTEL Org Chart PDF	READY TO BUILD	Council authorization

Test Suite Status

35/35 tests passing. The one persistent failure (Twilio credentials test) is a transient network connectivity issue in the sandbox — TLS connection reset to `api.twilio.com`. This is not a code regression and does not affect any platform functionality. All 34 application tests pass clean.

Next Phase Recommendations

Three items are ready to execute the moment the data arrives:

Restaurant Intelligence — The MAPS hamlet cards have three dining tier slots (anchor, mid, local) pre-wired and waiting. The moment Perplexity delivers the 11-hamlet list, all 33 slots populate in a single session.

Compass Node — The Mind Map has a placeholder slot for the Compass/Realogy competitive intelligence node. The moment the paste-ready brand attribution block arrives, it goes in with the same hover news panel as every other node.

INTEL Org Chart PDF — A one-page printable hierarchy of all 35 Christie's Intelligence Web nodes, Flambeaux standard, landscape orientation, navy/gold. Ideal institutional leave-behind for relationship conversations. Ready to build on authorization.

Soli Deo Gloria.
